# FROM THE PRESIDENT

Well we're a quarter of the way through 2018, where has the last 3 months gone?

March seen a couple of good local events and lots of members travel for other events in different disciplines around the country. Some having good results, others needing to pull Subaru engines apart again and one with a big rebuild to do on a car.

Well done Curtis and team on a great Autocross event, seems some of the juniors have improved big time over summer, catching a few of us old timers out.

The Motorkhana was a great display to our visiting competitors for away that we really do run great events , with some 18 runs for the day. Some see no big deal in this until you travel away and are lucky to do 6 for a day with a much higher entry fee.

That's about where the good side of this months report ends for me.

In March we held the first meeting for the 2018 Legends of the Lakes Hillclimb. The attendance was, let's say, average by club members and that average puts serious doubt over the event running in 2018 and beyond.

For an event that had record entries in 2017, more than 200 over 3 days, it makes the club a nice little profit to continue in the way it has for the last 12 years, with lots of new equipment bought for SEAC park, a clubrooms and venue second to nowhere in this country.

It's very, very hard to think that we are struggling to fill positions to make this happen. For the event to continue, we need a lot of new blood, the crew that set the track up are getting older and are starting to struggle big time with the task.

No track built = No race.

# FROM THE PRESIDENT

We see lots of SEAC members say we're too busy to help the weekend prior, any time during working hours the week prior or week after packing up due to work commitments.

Trust me! We all have that problem. I'm self employed and don't earn a living for 3 weeks over Legends.

Or still, outside of regular hours, too busy to offer an hour or two helping out.

But time and time again the small group see the other members driving up and down the hill checking on the progress as spectators to the hard work.

We need 3 key officials to learn and help this year to make it happen and to give the event the future it deserves.

We need someone to learn the Secretary's position. Wendy and Helen are willing to help again this year but this will be their last, and now is the time for a team player to step up and learn and help.

Race Controller for the weekend is something that the event can not run without. Steve has been in this position now for a number of years and has done an exceptional job but now wants to maybe have a drive himself, and step back a little from the massive task he has done over the last few years. This is Steve's last year in the job and the last chance to teach a new Race Controller the ropes.

# FROM THE PRESIDENT

The biggest thing our event needs is sponsors to make it happen, with both in kind support and generous \$\$\$.

Bob, Reece and Curtis have done a great job of this over the years. Bob has put in a massive amount of work over the years to make this job as easy as possible to undertake in to the future. Reece did the work for a few events but work and family commitments mean its time for Curtis to have a new helper and look at gaining some new sponsors to the event.

The next meeting is set down for the 26th of April at 7:30pm, at our clubrooms.

Please come to the April General Meeting and the Hillclimb meeting and offer some assistance to keep this event that has grown to be so very popular around the country on the calendar for years to come.

Cheers,  
See you all sideways on the dirt soon,  
Kev

# Lake Gairdner Speed Week

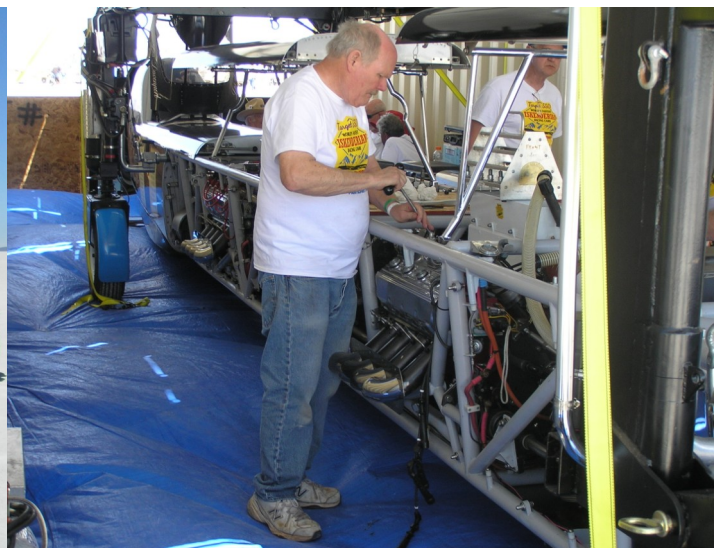

*....everything on the dry salt lake seemed to be floating on the shimmering heat haze, so it was difficult to see the car coming towards us waiting at the two and a half mile mark.*

*The first thing I could see was the salt spray way out in the distance and then came the unmistakable sound of two huge blown, injected alky burning Hemis accelerating hard.*

*The forty three feet long black streamliner shot into view and I struggled to get some film of it as it disappeared almost as fast as it came, popping the parachute out near the five mile mark at 345 MPH! (560 KPH). That was "Target 550", an unbelievable piece of engineering built with the sole purpose of breaking the land speed record for a wheel driven, piston engine car by 100 MPH (160 KPH). They had already run 386 MPH at Bonneville at 40% throttle, but transmission and driveline failures had prevented anything faster. This team brought twenty tons of gear from the USA to Australia and then transported it over 150 km of unmade corrugated Aussie road to Lake Gairdner in SA, then dropped an inlet valve on their first run, clocking 297 MPH on one engine.....*

*I was lucky enough to talk to a couple of the mechanics that night over a beer and their attitude was very up beat "well, it has beat the shit outta the piston, but it will go again, we have got spares, we will fix it , we will go faster"..... and they did.....*

# Lake Gairdner Speed Week

*There was also another American team there with the aim of becoming the fastest motor cycle in the world.*

*Piloted by a lady, one Valerie Thompson, (daughter of Mickey Thompson ) they waited four days for the right wind (none ) and ran 328 MPH.*

*I am not sure if this officially gives them the record, but it sure is fast on two wheels. Powered by a specially built, V4 quad cam turbo engine of just under 3 litres, producing 511 hp, this was also a masterpiece of engineering.*

*However, at Lake Gairdner, they have classes for almost everything – one guy clocked 117 mph on a postie bike! A bit slower than a Hyabusa at 260 + mph.*

*Drivers have to qualify at increasing speeds, 150mph, 175mph and so on to ensure that they and their cars are capable of handling the high speeds involved.*

*It is not just a matter of building a big powered monster, as the aerodynamics of the cars are critical to the handling.*

# Lake Gairdner Speed Week

*It is not uncommon for a driver to have a high speed spin, despite travelling in a straight line ! Constructors of the vehicles take great care to have the centre of pressure and the centre of balance in just the right place to ensure the car will actually stay on the ground and not try to fly !*

*Among the array of Lakesters, Hotrods, modified street cars and every kind of stock and modified motorbike, there was some very fast cars. A Hudson terraplane which is very un aerodynamic reached 186 MPH then had a spin which lasted just over 440 metres. Now that is a lose.....*

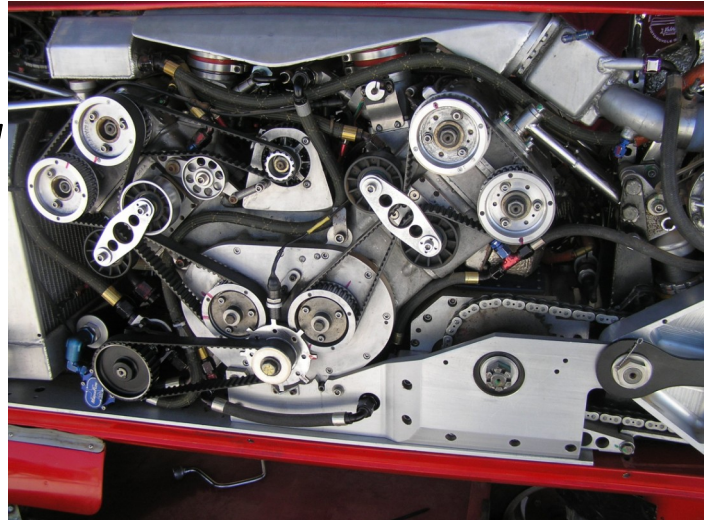

*A BA XR8 ute capable of 255 mph, several super fast Trans Ams, an XG Ford panelvan running LPG at over 180 mph, an XA coupe at over 200 mph and the "worlds fastest Commodore" at a staggering 268 mph! The driver of the VR Commodore owns the record set last year at 272 mph but could not quite better it this year, ending his week ( and the car ) by rolling it at the five mile mark.*

*He walked away unscathed, thanks to a chrome moly full chassis and cage. It was a pretty special VR, complete with a 572 cube big block burning methanol, a Lenco transmission and a Ford 9" diff. Hopefully the "bronze Aussie" as it was named will be rebuilt for next year.*

# Lake Gairdner Speed Week

*It was a great four days at Lake Gairdner, which lies at the northern foothills of the Gawler ranges and about two hours north west of Iron Knob. Measuring approximately 160 km long by 50 wide, with hard salt up to 1.2 metres deep, regulars to the event call it "the big white dyno". The race meet is conducted every year by the Dry Lakes racers association ( DLRA )*

*The salt lake is a catchment area which dries through summer to a hard level surface which is ideal to run vehicles at high speed for about five miles. Depending on the conditions, some years have had up to eight miles available.*

*It is surprising who attends these races, with local personalities Terry Masters and John Evans spotted among the petrol heads in attendance.*

*One of the things that stood out to me was even though alcohol was not banned among the spectators, there were no fights, NO rubbish left anywhere, and no idiots 'chucking mean skids' after the racing. Competitors were always ready to talk about their cars and experiences with anybody who asked, coming from as far away as Queensland and Perth, demonstrating the dedication that racers of all types have to their sport.*

*Would I go again?*

*Road trip, camping, watching fast cars, a couple of beers at night under the stars, why not?*

*Cheers, Locky*
